

Tiger Machine Company

QUALITY END PRODUCTS CONCRETE MASONRY PRODUCTS

TIGER equipment has the flexibility to produce tens of thousands of concrete masonry products. The variety of these products is only limited by the imagination of the producer, builder or architect and the physical constraints of nature.

Concrete masonry products made with TIGER equipment are durable, strong, attractive, and aesthetically pleasing to. These units can use lower cement rations than competitive made products; have greater physical characteristics such as a higher density and lower water absorption.

Tiger equipment is flexible and capable of making thousands of shapes, sizes, textures, colors and types of concrete masonry products. We lead the industry in innovative and versatile approaches to the manufacture of quality building materials.

These products cover a wide range of areas of construction and are used in virtually every type of building. Including commercial, single and multi-family residential, industrial, governmental, health-related and institutional buildings.

TIGER concrete masonry end-products can be manufactured multi-textured and multi-colored. This gives architects and engineers the flexibility of design to create unique yet functional masterpieces of building construction.

TIGER equipment can manufacture high-quality concrete masonry units, architectural units, paving stone units, landscape and hardscape units, environmental units and even specialty units designed for unusual applications.

TIGER innovative concrete masonry products used in environmentally sensitive fields are very popular. For example, articulated concrete masonry unit paving has emerged as a cost effective system used to prevent soil, riverbank and coastal erosion.

TIGER

QUALITY END PRODUCTS

Split-Face Masonry

Another popular TIGER concrete masonry end product used today are the great variety of segmental retaining wall concrete units (SRWU). They are easy to design with many "value added" features such as special textures and multiple blended colors. They are a cost effective building material to construct durable and beautifying earth retaining systems. (Many of these products require a license agreement by a prospective producer that must be acquired from the licensor).

Load Bering Masonry

Striated Block

TIGER also has a complete line of specialized equipment to manufacture concrete pavers in large volumes, although most TIGER concrete product machines can make concrete pavers in diverse quantities.

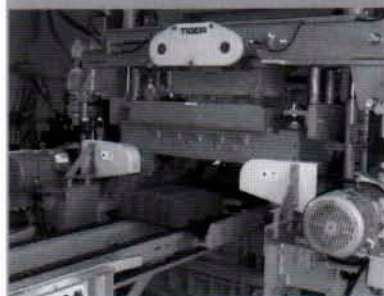

Landscape Products

Interlocking Pavers

Model D-3

Patio Stones

Decorative Products

Architectural products such as: split block, soft-split block, fluted block, cored brick, frogged brick, pitched block and brick, slump block, scored block, ribbed units, acoustic protection block, ground face block, sand-blasted units, prefaced units (such as glazed and covered), offset units, and honed units are just some of the concrete masonry blocks that can be made in a myriad of sizes, shapes, colors and textures by TIGER equipment.

Structural Masonry

No matter what the concrete masonry product you want to manufacture, TIGER has solution for your company. Consult your nearest TIGER representative to find out what TIGER can do for your business, we are here to help you succeed in the concrete products industry.
