

Tiger Machine Company

TIGER EQUIPMENT SPECIALTY EQUIPMENT

TIGER manufactures the most extensive and flexible line of specialty equipment in the concrete products industry. TIGER can provide off-line as well as in-line systems capable of adding value to your architectural masonry, concrete paving stone units, landscape or hardscape products.

From multiple versions and configurations, to semi-automated, to fully automated specialty products handling and manufacturing systems, TIGER can cover all your specialty products needs.

TIGER manufactures product "tumbling" and "rumbling" systems as well as "chainer" systems. All of these systems are designed to provide the "Antique look" masonry products that is so coveted by today's architects, builders and consumers.

Splitting masonry for a "rock-face" or "striated look" is not enough these days. Consumers demand new products and new looks for their finished project. Producers need to make value added products that cover the markets increasing product variety needs and enhance their profitability.

There are many other specialty product equipment and components available from TIGER such as off-line and in-line de-cubers and re-cubers for chainers, tumblers, and rumblers. Also available from TIGER are multiple types of splitting, chipping and re-packaging lines.

Accessory specialty equipment such as cull pallet ejectors, low, medium and large capacity pallet accumulators, auto-sensing lazer height scales, automatic pallet turnovers and pallet cleaners are also available.

No matter what your needs for specialty equipment are, TIGER has a solution for your project.

In-Line Chainer

Pallet Accumulator

Off-line Chainer

In-line Rumbler

Off-line Cuber

Height Scale

Tumbling Line

Off-line De-cuber

Leadership through innovation.

Please discuss your plant requirements with a TIGER representative. Our TIGER team of experts in the field of concrete product manufacturing are ready to assess your needs and provide the equipment that best suits your requirements. Let us help you identify the correct specialty machine to fit your product applications.

TYPICAL AUTOMATED TUMBLING LINE
